Smart Entrance

BY POLLMEIER

What we think about ...

Because no feature of a room is used more often than a door, it should do more than serve a purpose. It is a crucial element of interior design, the connecting element of the rooms in which we live. **Smart Entrance - Touch to open** offers innovations that change the way of entering a room. **Visually, haptically, and acoustically.**

Planum

Smart Entrance – Touch to open

Smart Entrance – Touch to open combines high quality mechanics and modern electronics, allowing the locking and unlocking of an interior door by touch. This technology offers not only more comfort and different haptics, but also completely new possibilities of interior design.

Smart Entrance offers its users a special experience concerning the contact with doors, eliminating the turning motion of the door handle.

The manner of entering a room ...

Optics

To open a door by touch sets a new standard. It makes the classic turning mechanism of the door handle redundant and allows for completely new ideas of interior design. The outstanding high quality look harmonises with modern and architecturally ambitious concepts for living areas.

Acoustics

A door handle with Smart Entrance technology serves the well-being of its users, because the door closes effortlessly and quietly.

Haptics

When a simple touch opens a door, any other movement is superfluous. With Smart Entrance technology living areas open up intuitively and fluidly.

Vigo

Stylish, timeless, and advanced

Through our love of detail we developed the new handles for wooden doors in familiar forms with precision, which creates a modern and extraordinary look. The clear and modest use of forms makes for a perfect combination of look and function in a modern living ambience.

Handle design for individual wooden doors

Those who are uncompromising regarding the design and material of doors also pay special attention to lock technology. Give your door a personal touch. Not until the lock is combined with the perfect handle does it become a stylish design object.

From an idea to the finished product ...

Ever since its foundation in 2000, the Baugruppentechnik Pollmeier GmbH, based in Hövelhof, works passionately on the development of innovative and design-oriented door mounting solutions. The company produces high quality and precise swinging and sliding door fittings for glass and wooden doors. With its 65 employees, it represents experience, knowledge, creativity, innovation, and solidity.

With the idea of creating something completely new and revolutionary, and with the successful cooperation of creative and dedicated employees, the company became a manufacturer of remarkable solutions.

It was thus possible to create something impressive, something that guarantees exceptional quality and durability: Smart Entrance.

We help you to be different.
